Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on ____.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Objections

1. Claim 20 objected to because of the following informalities: "divider" should probably be divided. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1,2,5-7,10-12,15-17,19,20 are rejected under 35 U.S.C. 102(b) as being anticipated by Sweet (USPN 3,487,972).

With respect to claim 1, Swett shows a container base (13) including a bottom, a back wall, being the back portion of element (14), having a first end and a second end, a generally circular side wall (14) having a length and further including a first side wall end adjacent to the back wall first end and a second side wall end adjacent to the back wall second end, the length and back wall defining a space, the space being disposed over the bottom', the space further comprising a first cross member (19) and a second cross member (19), Swett labels both of his cross members with the element (19), the first and second cross members further defining the space into a first compartment, a

second compartment, and a third compartment; and, a cover affixed to the back wall, the cover disposed to reversibly cover the space of the container.

With respect to claim 6, Swett shows a container (10) including a bottom, a back wall having a first end and a second end, Swett does not label his wall components, yet he does show a back wall having a two ends, a generally circular side wall (14) having a length and further including a first side wall end adjacent to the back wall first end and a second side wall end adjacent to the back wall second end, the length defining a space, being the inside of the container; the space further comprising a first cross member (19) and a second cross member, the second element (19), the first and second cross members (19) further defining the space into a first compartment, a second compartment, and a third compartment (fig. 2); and a cover (11) sized to reversibly cover the space of the container.

With respect to claim 11, Swett shows a container including a bottom (12), a back wall, a first side wall, and a second side wall. As stated before Swett does not particularly call out his, a back wall, a first side wall, and a second side wall but (fig. 1) clearly shows them.

The container having an interior defining a space; the space further comprising a first cross member (19) and a second cross member, the second element (19), the first and second cross members further defining the space into a first compartment, a second compartment, and a third compartment; and a cover (11) affixed to the back wall, the cover disposed to reversibly cover the space of the container.

With respect to claim 16, Swett shows a container including a bottom (12), a back wall, a first side wall, and a second side wall, as stated before Swett does not particularly call out his, a back wall, a first side wall, and a second side wall but (fig. 1) clearly shows them. The container having an interior defining a space; the space further comprising a first cross member (19) and a second cross member, the second element (19), the first and second cross members further defining the space into a first compartment, a second compartment, and a third compartment; and a cover (11) sized to reversibly cover the space of the container.

With respect to claims 2,7,12,17, Swett discloses rigid material plastic (col. 1 ln. 27).

With respect to claims 5,10,15,19 Swett shows the lid (11) further includes an exterior surface on which ornamentation can be applied.

With respect to claim 20, Swett shows a container base (13) further divided into at least three compartments (fig. 2) and a lid (11) disposed to reversibly seal the container base.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 3,8,13 rejected under 35 U.S.C. 103(a) as being unpatentable over Swett (USPN 3,487,972) in view of De Laforcade (USPN 6,857,432).

Swett discloses the invention substantially as claimed. However Sweet does not disclose a latch.

De Laforcade teaches a container with a latch in the analogous art of partitioned containers for the purpose of holding the container closed.

It would have been obvious to one having ordinary skill in the art at the time the invention was made add a latch to the container of Swett as taught by De Laforcade in order to hold the container closed.

6. Claims 4,9,14,18 rejected under 35 U.S.C. 103(a) as being unpatentable over Swett (USPN 3,487,972) in view of Barabino (USPN 5,046,620).

Swett discloses the invention substantially as claimed. However Sweet does not disclose the container further including a prepackaged wipe.

Barabino teaches a container with a including a prepackaged wipe in the analogous art of partitioned containers for the purpose of transporting prepackaged wipes.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide prepackaged wipes in the Sweet container as taught by Barabino in order to transport prepackaged wipes.

Conclusion

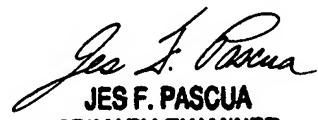

Please refer to 37 CFR 1.6(d) and 1.8(a)(2) for filing limitations concerning facsimile transmissions and mailing, respectively.
